BUCKINGHAM 55 APPOMATTOX - 42

The Buckingham Jayvees used three big quarters to defeat the Baby Raiders 55 to 42 in a non district game January 25. Again the foul line haunted the Raiders as they connected on only 4 of 14 tries.

HEALTH WISE

The next time someone tells you that 'you have water on the brain' regard it as a complement. You do. But that doesn't make you dumb, it makes you smart. All the amazing electro-chemical reactions (usually called thinking) take place in a water medium. Compared to other body organs, the brain has a larger percentage of water by weight. So you see water is vital for all your thought processes.

In fact every body function requires water. Your eye is a good example. The surface of the eye is constantly moistened with a film of water. If it were not so, your eye would become dry and inflamed, very painful, hard to open and close, and soon you would loose your sight.

And if it were not for 2 Million sweat glands that constantly moisten your skin, it too would become dry, cracked, and shriveled.

The more water you drink the less work your kidneys have to do in eliminating body wastes. Its like washing the dishes in a cupful of water instead of using the kitchen sink. Its so much easier and cleaner if you use a sinkful than if you try to do it with only a cupful. The kidneys work in the same way. If they get an abundance of water, their work load is greatly reduced.

Many suffer from constipation because they do not drink sufficient water. Their stools are hard and dry instead of normaly soft. Water also controls body temperature. When you drink plenty of water you can perspire freely, thus cooling you when necessary. Drinking plenty of water will help prevent infections of the kidneys, and the formation of kidney and bladder stones.

Your health -- good health -- depends on water. Develope the habit of drinking water regularly.

Water is such an essential element of life that GOD Himself used water to illustrate His concern for mankind by saying: 'Whosoever will, let him take the water of life freely.'
